II. Education Goals Document – Implementation

The group discussed the implementation and use of the vision documented in the goal. The group completed a gap analysis with the intention of finding a focus or starting point for implementation. The group decided the next step was to survey the staff at both schools to find out where the teachers they are already in step with the vision, where they are not, and how important they each of the major goals are. Dale will send the survey, possibly as part of the DCS Experience survey.
